## SpaceSaver 2 Cylinder Horizontal Fill Enclosure

### Model 300H

\*Patent Pending

The SpaceSaver Model 300H is designed for mobile SCBA and SCUBA cylinder filling. Model 300H can be installed directly onto Fire and Emergency vehicles. The fill station is designed to contain SCBA or SCUBA cylinder and metal fragments in the event of a rupture during the filling process. Model 300H utilizes an advanced horizontal design to maximize the use of critical space and allow for compartment mounting over the rear wheels. Model 300H allows the filling of two (2) SCBA or SCUBA cylinders simultaneously or individually. With our versatile optional air control panel system, the unit can be customized to fit your specific needs. Various installation options are available.

## Specs

- \* Body constructed with 3/16in. & 3/8in. Plate Steel for maximum safety and protection from rupture.
- \* Door constructed with 1/4 in Stainless Steel.
- \* Simultaneous or separate SCBA cylinder filling options.
- \* Ergonomically designed with assisting devices to assure smooth operation and reduce operator fatigue.
- \* Automatic safety interlocks prevent SCBA or SCUBA cylinder filling until the door is completely closed.
- \* Height 13.00" Width 42.50" Depth 25.00" Weight 400 lbs.
- \*Optional Air Control Panel shown. Height 9.75"
